

DIE FLEX WIRE POLISHER WP100

The Die Flex WP-100 wire polishing machine is designed to easily work diamond, PCD, ceramic or carbide dies to a mirror finish. It can work the angle or bearing by rotating the die table with a simple to use tool free lever clamp. The wire is held between two fully adjustable clamps which makes centering the wire fast and easy. The dies are held in metric or inch collets that centers the die with the hold down cap. The work guard uses a CE rated safety switch and circuit to keep the operator safe but not impede the work area or setup times. Die Quip uses standard electrical components and a simple mechanical design to produce the lowest cost to operate machine in its class.

MACHINE SPECIFICATIONS

Work Holding Capacity:
1 - 1 1/2" (25 - 43mm)

Electricity:
220V, 50/60 Hz, 1 phase

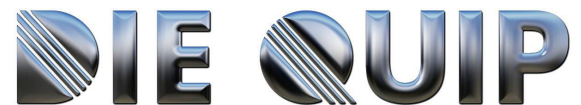

Machine Dimensions:
24 x 24 x 36" (61 x 61 x 92cm)

Weight:
185 lbs (84 kg)

Angle:
0 to 40 degrees included

Stroke Length:
4" (101mm) 160 strokes/minute

Maximum Internal Polishing Capacity:
.008 - .125" (0.250 - 3mm)
