

CYLINDRICAL PLATED PINS

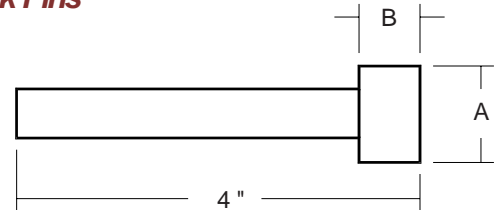

Die Quip's line of electroplated grinding pins feature hardened steel shanks and diamond or CBN abrasives. These precision grinding pins are ideal for use in internal or jig grinding applications where tool rigidity is critical to control diameter tolerances and tool life. Through our special electroplating process, abrasive exposure is maximized for an open cutting action that greatly reduces heat and wear.

1/4" & 3/8" Shank Pins

1/2" Shank Pins

STANDARD ELECTROPLATED PINS*
