

DC DIE CLEANER

Die Quip's DC Die Cleaner is designed to remove drawing lubricant from the die before inspection or reworking. It is a rotary tumbler that uses triangle ceramic media to physically remove lubricant or rust from the outside of dies while the nonhazardous* solvent cleans the inside of the dies. Its large tank allows large quantities of dies to be cleaned at one time and does not need to be cleaned as often as ultrasonics. The DC features a heavy duty removable drum for easy loading and unloading, safety switch to prevent operation with the lid open and operates off a digital timer with automatic shut off.

DC Specifications

Drum Capacity 50 R5 1 1/2" (38mm) Diameter
30 R6 2" (51mm) Diameter
10 R7-9 3" (76mm) Diameter

Solvent Required: 5 Gallons (19 Liter)

Media Capacity: 35lbs (16kg)

Machine Weight: 230lbs (105kg) without Dietron and media

Electricity: 120V, 60Hz, 1Phase, 6 Amp or 220V, 50 or 60Hz, 1 Phase

DC Supplies

<u>Part No.</u>	<u>Descriptions</u>
60337501	DQ 3/8" (9mm) Triangle Media
60362500	DQ 5/8" (16mm) Triangle Media
60330006	Dietron Solvent 5 Gallons (19 Liter)

* As determined by US hazardous material criteria.
