

# MICROSCOPES ACCESSORIES

Die Quip can improve the performance of a new or existing microscope with better lighting and proper fixturing. We have ring, gooseneck and light pads to meet every lighting need.

## DIE STANDS

Die Quip's line of die stands quickly allow you to convert any microscope in to a die inspection station. We have two standard sizes that can handle dies from 1" to 3" outside diameter and can make custom sizes to meet your needs. The die stands feature an anodized red finish and spring loaded tables that hold the die in position for hands free operation. A through hole allows bottom light to pass through for better images of the die.

**91004000 Die Stand for 1, 1 1/8, 1 1/2 & 2" Die Cases**

**91004001 Die Stand for 25, 42, & 52mm Die Cases**

**91004700 Die Stand for 1 1/2, 2, 3" Die Cases**

## WIRE INDEXING FIXTURE

Our wire indexing fixture can hold wires up to a 3/8" diameter for visual inspection. The fixture holds the wire in place and lets you rotate it 360 degree for inspection and enables others to see without constantly refocusing the microscope or repositioning the wire sample. Die Quip's wire indexing fixture features a keyless chuck and red anodized body.

**Order Number 91002200**

**Flourescent Ring Light**

**Fiber Optic Ring Light**

**Light Pad**

## LIGHTING

Greater light output reduces operator fatigue and provides the ability to see work subjects at higher magnifications with better images. Die Quip's fluoresent rings provides 360 degree of uniform, shadow-free surface light and 400 foot candles of brightness at a distance of 3". For adjustable lighting with either single or dual spot lighting our fiber optic gooseneck and light pad attachments will provide the sharp white light needed to make precise visual inspections.

<b>Part No.</b>	<b>Description</b>
34900800	Fluorescent Ring Light
