

STEEL ANGLE PINS

Die Quip's line of steel angled polishing pins are made from tool steel that is hardened to 45/50 Rc to resist wear while polishing with diamond compound. They are available in two different forms and many different angles. First, is our ground pins that are ready to use and are precision ground to a tolerance of +/- 15 minutes of a degree. The blank pins are rough formed and should not be used until they are precision ground. Blanks are intended to reduce costs for die shops with a pin grinder compared to grinding them from a rod.

STANDARD STEEL ANGLE PINS*
